Professional Summary

Frontend Engineer with 3 years of professional experience building enterprise-grade **web and mobile applications** using **React, TypeScript, and React Native**. Experienced in modernizing legacy systems, designing scalable UI architectures, and delivering cross-platform solutions through direct collaboration with US and UAE stakeholders. Specializing in building scalable, high-performance digital products by combining strong UI/UX design expertise with modern frontend engineering.

Core Technical Skills

Frontend Engineering: React.js, TypeScript, JavaScript (ES6+), Next.js, React Native, Expo, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Vite.

UI/UX Design: Figma, Adobe XD, Adobe Photoshop, Design Systems, Wireframing, Prototyping, Responsive Design, User Experience (UX), User Interface (UI)

Backend & APIs: RESTful APIs, Swagger, Supabase, PostgreSQL, MySQL

DevOps & Tools: Azure DevOps, Agile, Git, GitHub, Vercel, Google Play Console, Apple App Store Connect

Modern Technologies: Three.js, React Three Fiber (R3F), Generative AI, Prompt Engineering

Professional Experience

Developer I – Software Engineer

Jan 2024 – Present

UST | Thiruvananthapuram, Kerala, India

Enterprise Healthcare Information Platform (Confidential US Healthcare Client)

Modernized a 15-year-old enterprise healthcare metadata platform for a confidential US healthcare client.

Key Achievements

- Modernized a 15-year-old enterprise healthcare platform by redesigning and rebuilding **35+ application screens** using **React.js** and **TypeScript**, significantly improving usability, maintainability, and application performance.
- Designed the complete UI/UX from scratch, creating **15–20 reusable React components** that established a scalable and consistent design system across multiple enterprise modules.
- Integrated **60+ RESTful APIs** with frontend modules, collaborating closely with onsite US development teams to deliver secure, high-performance user experiences.
- Worked directly with US-based stakeholders **three times per week**, leading requirement discussions, feature demonstrations, design reviews, and iterative product improvements. Collaborated within a five-member Agile team alongside onsite API developers and US stakeholders throughout the product lifecycle.
- Designed and implemented a reusable **Favorites Search** framework, enabling users to save personalized search configurations across Dictionary, Glossary, Code Tables, and Data Lineage modules, substantially reducing repetitive workflows.
- Developed configurable enterprise data grids with persistent column personalization using persistent local storage, improving usability and data visibility for large healthcare datasets.
- Implemented bulk upload and bulk editing functionality for multi-record updates, streamlining administrative workflows and reducing repetitive manual operations.

NTRL Digital Fitness Ecosystem (*Production Application*)

End-to-end digital fitness platform comprising web, admin, coach, and mobile applications.

Key Achievements

- Designed, developed, tested, and deployed a complete digital fitness ecosystem comprising a **public website, Admin Portal, Coach Portal, and cross-platform mobile application** using **React, React Native (Expo), TypeScript, and Supabase**.
- Built and maintained **80+ responsive screens** across web and mobile platforms, delivering a consistent and intuitive user experience while integrating **40+ RESTful APIs**.
- Collaborated directly with **UAE-based stakeholders** throughout the project lifecycle, conducting **2-3 client meetings per week** for requirement gathering, UI/UX discussions, feature demonstrations, and iterative product improvements.
- Developed role-based authentication and comprehensive features including **diet and workout management, health check-ins, progress analytics, blood report management, document sharing, push notifications, PDF exports, and coach-client collaboration workflows**.
- Integrated **Stripe payment gateway** for secure subscription and payment processing and successfully deployed the application to both **Google Play Store** and **Apple App Store** on behalf of the client.
- Managed the complete frontend delivery lifecycle, including UI/UX design, API integration, testing, deployment, production support, and continuous feature enhancements.

Technical Projects

- **ForecastNow – Advanced Weather Application** | React • TypeScript • Open-Meteo APIs
Modern weather application featuring forecasts, AQI, travel planner, weather comparison, favorites, and interactive dashboards.
- **Orbit – Interactive 3D Portfolio Experience** | React • TypeScript • Three.js • React Three Fiber
Interactive Three.js portfolio showcasing 3D graphics, animations, and React Three Fiber expertise.

Education

Bachelor of Technology (B. Tech) – Computer Science & Engineering

SNM Institute of Management & Technology, Maliankara, Kerala | Graduated: 2023

Certifications

• **JavaScript** (Udemy, 2024) • **UX/UI Design Thinking** (Udemy, 2025) • **Prompt Engineering for Bootcamp** (Udemy, 2025)
• **Prompt Engineering Advanced** (Percipio & UST, 2026) • **Token Intelligence** (Percipio & UST, 2026)

Recognition & Achievements

- Received **Client Appreciation** from a US-based healthcare client for delivering innovative enterprise features that significantly improved workflow efficiency and user productivity.
- Recognized by management with **internal appreciation certificates** for outstanding technical contributions and product delivery.
- Received **Skip-Level Management Recognition** for consistently delivering high-quality solutions and contributing to business-impacting product improvements.
